CAREER SUMMARY

AWS-certified Full-Stack Developer and Computer Science student with hands-on experience building scalable and user-focused applications. Proficient in modern web technologies including ReactJS, React Native, Node.js, Express, NestJS, MongoDB, PostgreSQL, and ASP.NET. Experienced in developing RESTful APIs, integrating third-party services, and deploying cloud-native solutions on AWS. Comfortable working with Git, Docker, CI/CD pipelines, and agile methodologies. Passionate about creating impactful solutions in the health and wellness space and continuously expanding expertise in cross-platform mobile development and fitness tech integrations.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (SAA-C03) Cert Prep: Cloud Services Overview LinkedIn Learning – Certificate of Completion**
- **HP LIFE – Introduction to Cybersecurity Awareness**
  Certificate of Completion
  Learned about common cybersecurity threats and basic methods to secure online data and information.

EXPERIENCE

Bright Champs | Remote | Software Educator | (10/2024 - 4/2025)

- Delivered engaging coding lessons with a focus on computational thinking and real-world problem solving.
- Mentored 50+ students across varying skill levels, leading to a measurable improvement in code comprehension, with weekly assessment scores increasing by an average of 20%.
- Contributed to curriculum enhancement by incorporating project-based learning, which improved student engagement and retention.

(Personal Project) | Remote | Full Stack Developer Intern | (02/2024 – 05/2024)

- Contributed to the development of a full-stack web application by implementing robust backend functionalities using JavaScript, Node.js, and Express.
- Collaborated with front-end developers to ensure seamless integration, enhancing overall user experience.
- Optimized backend queries, reducing API response times by 30%, and debugged critical server-side functions, improving application uptime by 15%.
- Played a key role in building the core backend infrastructure that supported real-time data fetching and user authentication, laying the groundwork for future scalability.

SKILLS AND STRENGTHS

Frontend: HTML, CSS, JavaScript

Backend: Java, C++, C#, ASP.NET, Node.js

Databases: MongoDB, MySQL, SQL

Tools: Git, GitHub, Postman, Cursor

Frameworks: React, ChakraUI, Express

PROJECTS

Video Calling Interview | github repo
- Developed a full-stack video interview application using React, Next.js, and Stream API.
- Implemented real-time communication and user authentication with Clerk.
- Tested by 30+ users; focused on responsive design and performance.

Bookstore Management System | github repo
- Created an ASP.NET Core MVC app for inventory and customer management.
- Implemented role-based access for admin, staff, and customers.
- Streamlined operations for a local bookstore.

EDUCATION

Bachelor's in Computer Science | Lebanese International University
