ReactJS | React Native | NextJS | Tailwind CSS | TypeScript | ExpressJS | Laravel | C# | Python | GO | RESTful API | GraphQL | | JWT | MySQL | MongoDB | Docker | Firebase | AWS | Git & GitHub | GitHub Actions | Postman

Certifications

- **AWS Certified Solutions Architect – Associate (SAA-C03) Cert Prep: Cloud Services Overview LinkedIn Learning – Certificate of Completion**
- **HP LIFE – Introduction to Cybersecurity Awareness**

Professional Experience

Nexrush Agency | On-site | Full-Stack Developer | Tripoli, Lebanon (06/2025 – 08/2025)

MADs App: AI-Powered Multi-Channel Video Marketing Platform for Sales & Marketing Teams::

- Spearheaded the development of MADs, a cutting-edge AI-driven SaaS platform built with Next.js 15 and React 19, enabling hyper-personalized video outreach across email, LinkedIn, and CRM systems, resulting in revolutionary sales and marketing automation capabilities.
- Developed and integrated core AI-powered features including dynamic video generation based on CRM/LinkedIn data, multi-step campaign creation workflows, real-time analytics dashboards, and automated multi-channel delivery systems, resulting in a 50% increase in user engagement and campaign effectiveness.
- Engineered robust frontend architecture with TypeScript, Tailwind CSS, and HeroUI components, implementing advanced features such as internationalization (Arabic, English, Spanish, French), responsive design, and smooth animations using Framer Motion, increasing user satisfaction by 30%.
- Built scalable component architecture with reusable UI components, context-based state management, and optimized performance through code splitting and lazy loading, reducing page load times by 35% and improving platform stability across web and mobile devices.

Elevvo | Remotely | Front-end Developer | Cairo, Egypt (08/2025 – Present)

- **Front-End Developer Intern at Elevvo:** Gained hands-on experience with HTML, CSS, JavaScript, and React.js by building responsive interfaces and contributing to real-world projects. Improved code performance and accessibility while applying UI/UX best practices.

Education

Lebanese International University - Tripoli, Lebanon

Bachelors of Science in Computer Science

Personal Projects

[Novamind:](#)

- Designed and developed a responsive website to represent our mission of inspiring and supporting every child's unique journey.
- Integrated features such as an inquiry form, parent testimonials, and a photo gallery to build trust and engagement.
- Focused on storytelling and UI that reflects our roots, values, and tradition.
- Tested by 30+ users; optimized for performance, mobile responsiveness, and smooth navigation.
- **NextJS, TypeScript, Tailwind CSS and Figma**

[Video Calling Interview \(T-Code\):](#)

- Developed a full-stack video interview application using React, Next.js, and Stream API.
- Implemented real-time communication and user authentication with Clerk.
- Tested by 15+ users; focused on responsive design and performance.
- **React.js, Next.js, MongoDB, Express, Clerk and Stream**
