SUMMARY

Software Developer with hands-on experience building modern web applications using **React.js, Next.js, JavaScript/TypeScript, Express.js, REST APIs, SQL/NoSQL databases, and cloud deployment platforms**. Experienced in developing scalable frontend architectures, backend services, authentication systems, third-party API integrations, and responsive user interfaces. Strong experience with **Git, CI/CD, cloud deployment, Agile collaboration, and AI-powered development tools including Claude Code**.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication, RBAC

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Deployment: AWS fundamentals, Railway, Vercel

DevOps: Git, GitHub, GitHub Actions, CI/CD, deployment automation

Architecture: REST APIs, MVC, reusable components, modular architecture

Tools: Postman, Figma, Prisma, Clerk, Claude Code

Practices: Agile/Scrum, code reviews, debugging, responsive design, performance optimization

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03) Cert Prep: Cloud Services Overview LinkedIn Learning – Certificate of Completion
- HP LIFE – Introduction to Cybersecurity Awareness

PROFESSIONAL EXPERIENCE

Independent Projects | AI & Automation | Freetown, Sierra Leone |

- Built and deployed an n8n-based WhatsApp AI chatbot for Glamora client, integrating a verified Meta webhook via Cloudflare Tunnel for real-time message handling.

Forsa | Full-Stack Developer | Tripoli, Lebanon (06/2026 – Present)

- Building Forsa, a Tripoli-based internship networking platform connecting students and early-career talent with organizations offering internship opportunities.
- Architected the core data model in Prisma models covering users, organizations, opportunities, categories, and applications, with a full ERD and system architecture designed via Figma.
- Developed a category system for organizing internship listings by field/industry, improving discoverability and matching between students and organizations.
- Led end-to-end brand identity and product design: custom logomark, color system, and typography (IBM Plex Sans Arabic, Space Grotesk), reflecting a Tripoli/Lebanese cultural identity.

Glamora | Remote | Full-Stack Developer | Freetown, Sierra Leone (12/2025 – Present)

- Developing **Glamora**, a full-stack e-commerce platform with a modern, user-friendly interface, enabling seamless product browsing, ordering, and account management.
- Built a comprehensive **admin dashboard** to manage orders, users, products, and categories, streamlining business operations and improving overall efficiency.
- Implemented a secure **authentication and authorization system** using JWT, supporting user roles and protected routes for both customers and administrators.

- Designed and developed RESTful APIs using Express.js and integrated databases MySQL for efficient data handling and scalability.
- Deployed and managed the full-stack application using **Railway** for backend services and database hosting, configured environment variables and infrastructure, connected a custom domain purchased via **Namecheap**, and deployed the frontend on **Vercel** for fast, scalable delivery.
- Leveraged **Railway's GitHub integration and CI/CD pipelines** to automate deployments, enabling faster development cycles and reliable production updates.
- Optimized performance and responsiveness using React.js, Tailwind CSS, ensuring a smooth devices.

Telepaty | Android Developer | Tripoli, Lebanon | On-site (08/2026 – 09/2026)

- Developed an Android tax-payment application integrating a banking system for tax collection and processing in Kinshasa, Democratic Republic of the Congo.
- Built with Kotlin and Jetpack Compose, following clean architecture patterns for maintainability and scalability.
- Integrated the Ingenico device SDK to support POS payment terminals (Ingenico EX4000), enabling secure in-person tax payments.
- Implemented Viva Pay QR-code payment flows, connecting the taxes application to a banking backend for real-time transaction processing.
- Technologies: Kotlin, Jetpack Compose, Ingenico SDK, Viva Pay, Android Studio.

Nexrush Agency | On-site | Full-Stack Developer | Tripoli, Lebanon (06/2025 – 08/2025)

MADs App: AI-Powered Multi-Channel Video Marketing Platform for Sales & Marketing Teams:

- Spearheaded the development of MADs, a cutting-edge AI-driven SaaS platform built with Next.js 15 and React 19, enabling hyper-personalized video outreach across email, LinkedIn, and CRM systems, resulting in revolutionary sales and marketing automation capabilities.
- Developed and integrated core AI-powered features including dynamic video generation based on CRM/LinkedIn data, multi-step campaign creation workflows, real-time analytics dashboards, and automated multi-channel delivery systems, resulting in a 50% increase in user engagement and campaign effectiveness.
- Engineered robust frontend architecture with TypeScript, Tailwind CSS, and HeroUI components, implementing advanced features such as internationalization (Arabic, English, Spanish, French), responsive design, and smooth animations using Framer Motion, increasing user satisfaction by 30%.
- Built scalable component architecture with reusable UI components, context-based state management, and optimized performance through code splitting and lazy loading, reducing page load times by 35% and improving platform stability across web and mobile devices.

EDUCATION

Lebanese International University – Tripoli, Lebanon

Bachelors of Science in Computer Science

PERSONAL PROJECTS

Forsa:

- Designed and built Forsa, an internship networking platform connecting students with organizations offering internships, tailored to the Tripoli/Lebanon job market — tested by over 80 users.
- Modeled the core schema in Prisma models covering users, organizations, opportunities, and categories, with full ERD and architecture design.

Devallow:

- Engineered a production-ready LMS enabling instructors to create, organize, and publish courses with video lectures and learning materials journey.
- Implemented secure authentication, user profiles, and role-based authorization using **Clerk**.
- Built RESTful APIs with **Express.js** and integrated **Cloudinary** for optimized media storage and delivery.
- Tested by 30+ users; optimized for performance, mobile responsiveness, and smooth navigation.
